Dear Sir:

Preliminary to examination, the following remarks are being presented, including the enclosed Exhibits A to F.

REMARKS

The Applicants respectfully traverse the Examiner's allegation that "the arrangement of the elastic tie-members has not previously been the subject matter of the claims".

As ensues from the disclosure of the parent patent application, the arrangement of the elastic tie-members is the principal subject matter of the present invention.

According to the specification of the present application, "the elastic tie-members are arranged on the surface of the patient's body in antagonistic pairs so as to follow the anatomical arrangement of the skeletal muscles" (See lines 32-34 on page 5; line 1 of page 6 of the present Specification).

In the last amendment it was stated that "the elastic tie-members are arranged on the patient's trunk taking into account their position relative to the spinal column, that is, to the
